Data Engineer Vs Data analyst Vs Data Scientist Vs ML Engineer.

[day 10 of 100wd]

[Anglelist]

Various Data Based Job Roles:

1) Data analyst
2) Data engineer
3) Data scientist
4) ML engineer.

3. Data Scientist

Wednesday, March 24, 2021 1:26 PM

"A data scientist is someone who is better at statistics than any software engineer and better at software engineering than any statistician".

1) Data engineer (Data को ला कर के table पर देने का)

- is not easily available.
- OLTP - olinine transational database.
  - → OLAP - online analytic processing
    - → pipelines

database

datawarehouse.

Job roles

- Scrape data from given source
- Move/ store data. in optimal server / warehouse
- Build data pipeline / APIs for easy access to the data
- Handed database / data warehouse.

Skill Required.

- strong grasp of algorithm and data structure
- programming language (java / R / python / scala and script)
- advanced DBMS's
- Big data Tools (Apache spark, Hadoop, Apache kafka, apache Hive)
- Cloud plateform (Amazon web services, google cloud platform)
- distributed system
- Data pipelines

---

4. ML Engineer

Wednesday, March 24, 2021 1:26 PM

Responsibilities

- Deploying machine learning models to production ready environment
- Scaling and optimizing the model for production
- Monitoring and maintenance of deployed models

Skills

- Mathematics
- Programming Languages (R/Python/Java/Scala mainly)
- Distributed Systems
- Data model and evaluation
- Machine Learning models
- Software Engineering & Systems design

---

2. Data Analyst

Wednesday, March 24, 2021 1:26 PM

Responsibilities of a Data Analyst

- *Cleaning and organizing Raw data.*
- *Analyzing data to derive insights.*
- *Creating data visualizations.*
- *Producing and maintaining reports.*
- *Collaborating with teams/colleagues based on the insight gained.*
- *Optimizing data collection procedures*

Skills

- *Statistical Programming*
- *Programming Languages (R/SAS/Python)*
- *Creative and Analytical Thinking*
- *Business Acumen — Medium to High preferred*
- *Strong Communication Skills.*
- *Data Mining, Cleaning, and Munging*
- *Data Visualization*
- *Data Story Telling*
- *SQL*
- *Advanced Microsoft Excel*
